INDIMO
INCLUSIVE DIGITAL MOBILITY SOLUTIONS

Newsletter #6

December 2022

Be part of INDIMO - INclusive DIgital MObility solutions for all

In this issue, the **INDIMO** project presents its final results and recommendations to make digital mobility solutions more inclusive and accessible. Check the latest and last update on project news, events, and more!

Small Tip: if you have visualisation problems with this Newsletter open it via your browser

The INDIMO tools are changing how digital mobility apps are designed

It is not an end but a beginning of a long journey

The **INDIMO** project is coming to its end on **31 December 2022** after three years of work that aimed to make digital mobility more inclusive and accessible.

Three years of hard work of a **consortium of 15 partners** has delivered new, invaluable knowledge on the needs of people in vulnerable situation, their requirements towards digital mobility and delivery services, and the **INDIMO Digital Mobility Toolbox**, which is now available on our website in 6 languages.

We hope that the **Universal Design Manual**, **Universal Interface Language Manual**, **the Cybersecurity and Privacy Assessment Guidelines** as well as the **interactive Service Evaluation Tool** will help software and service developers, transport operators, user organisations and policy makers to design more accessible and inclusive services.

While the project finishes, our work certainly continues. This is only the beginning of a long journey to provide for the needs of all the people in vulnerable situations across the continent.
Our **joint recommendations** were released at our final event organized in collaboration with the **TRIPS** and **DIGNITY** projects on **7 December 2022**. We are asking for more funding for research and innovation in inclusive mobility; **a common European platform to exchange best practices**; and the addition of inclusive **co-design principles** to European and national guidelines and policies.

So, stay with us also after the official end of the project. Let's interact at conferences, European and national events and let's keep in touch on the **European Transport and Mobility Forum**, which will be a repository and place of interaction for tools, knowledge and best practice to support the development of user centric transport in Europe.

Kind regards,

Imre Keseru - INDIMO Project Coordinator
